MINI-BEND 10

STRAIGHTENING AND BENDING MACHINE

This bending machine offers unlimited workspace also for complex parts as a result of its unique design feature of the built-in working cylinder under the working table. The MiniBend 10 is small, compact, and affordable; the ideal machine for light-duty bending and straightening needs.

TECHNICAL DATA

Compressive force	100 kN (10 t)
Adjustable	0-100 kN
Cylinder stroke	150 mm
Clearance	200 mm
Motor power	1,1 kW
Operational pressure	260 bar
Bending capacity	100 x 10 mm bei V 60
Straightening capacity	light-duty work pieces
Tool height	100 mm
Dimensions (LxWxH)	1.000 mm x 650 mm x 1.100 mm
Weight	350 kg

PRECISE RESULTS WITHIN A VERY SHORT TIME

Horizontal straightening and bending machines ensure improved ergonomics and highest precision with greatest possible time savings - wherever where straightening and bending machines don't provide a permanent load of highly specialized equipment. This means - in contrast to e.g. to the flame-straightening, that require a lot of experienced personnel - that also low-skilled employees can be trained on a Kunkel bending machine. Even low-qualified personnel are thus able to produce precise work results within a very short time.

KUNKEL-MACHINES - AN INVESTMENT THAT PAYS OFF

The easy handling, the easy to understand control and the robust construction with fast tool change makes an investment in a Kunkel machine pay for itself - even at low utilization - within a very short time.

Rudolf Kunkel Maschinenbau GmbH

BY PRACTITIONERS FOR PRACTITIONERS

We have been building straightening and bending machines for 3 generations. Customers can't only expect quality „Made in Germany“, but also a high investment security. Kunkel machines retain their value. When deciding on a stronger, technically more advanced or newer machine we will accept the „old one“ in payment. We offer a comprehensive know-how and a powerful service.

STRAIGHTENING AND BENDING MACHINES FROM KUNKEL

Kunkel machines are suitable for manufacturing as well as industrial production. Our straightening and bending machines cause only negligible follow-up costs. All Kunkel tool holders are also suitable for self-made or existing tools / convertible. Another plus is the ease of use - every worker in your company can operate these machines. We offer machines for every budget. You have the choice – from cam control to fully automatic PC control. Upgrading and the trade-in of old Kunkel machines is possible.

WE OFFER COMPLETE SOLUTIONS - ACCORDING TO YOUR WISHES!
